

## Are there any routers that can replace fiber optic cables

### Overview

Any standard router, including the primary unit of a mesh Wi-Fi system, will work at its full potential with any standard Internet broadband terminal device —modem, Fiber-optic ONT, or others. That's true as long as the two can connect via a network cable, which is almost. The router is connected to the small device (let's call it James) using the yellow cable, and then James is connected to the wall with the green cable. Both the router and James require separate electrical plugs. What router would you recommend?

I'm looking for the absolute best—price isn't a. Most fiber ISPs, including Mercury, provide an ONT that connects directly to your router via an Ethernet cable. This means you don't need a specialized modem-router device, but your router must support high-speed Ethernet input. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Reliable connectivity, swift downloads, and strong coverage are within.
