

Can a 12-splitter be used to install broadband for two different companies

Overview

Yes, you can have two internet providers in one house —if different types of connections (e. Can I use a coax splitter for two different internet connections?)

Me and someone else in my house both need our internet from both of our separate routers. We're both on ignite rogers internet (same 1. But it depends on what's available in your area and how your home is wired if you. I've read that its technically possible, but in general I'd like 2 separate cable modems for internet to be connected on the same coaxial line by a splitter. This can be a tempting solution, especially if you have limited access to additional modem ports or if you want to avoid the cost and inconvenience of. Running two separate internet service providers under one roof used to be a luxury for large corporations, but it is now a practical solution for modern households. If you need to connect a modem and receiver to the same cable outlet, use the splitter and additional coaxial cable that's included in your Express Connect Kit. The splitter should only be used if the outlet will be.
