

# Electrical distribution box installation height

## Overview

The proper installation of a distribution box involves placing it at the right height to ensure safety and convenience. Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1.5 feet ( $\approx$  2 meter) high in front of the panel. The panelboard's door (hinged cover) shall be able to be opened to a full 90°. <iframe width="560" height="315". The placement and mounting height of this equipment are governed by stringent regulations, primarily outlined in the National Electrical Code (NEC). Adhering to these standards is mandatory, and homeowners must confirm their local code requirements, as jurisdictions may adopt the NEC with specific. "Getting your distribution box installation right isn't just about passing inspection - it's about sleeping soundly knowing you've eliminated hidden fire hazards that could put your family at risk," explains veteran electrician Marcus Boyle. "I've seen too many DIY jobs where people treated.
