

Energy and Transportation Internet

Overview

EI is an integration of DRERs, DESDs, real-time energy monitoring, information sharing, real-time pricing, and energy transactions. As part of the Los Angeles County Internal Service Department, the Clean Transportation & Energy Program (CTEP) delivers Los Angeles County's vision for a zero-emission transportation system. Join the. Energy Internet is a concept proposed to harness, control, and manage energy resources effectively, with the help of information and communication technology. Many steps have been done recently to put the EI into practise. These EI models have a lot in common, and yet no one has settled on a single. Hosted and convened by the Los Angeles Clean Incubator (LACI), the Transportation Electrification Partnership (TEP) is an unprecedented multi-year public-private partnership of 25 local, regional, and state stakeholders committed to accelerating transportation electrification and zero emissions. Assembly Bill 118 (Núñez, Chapter 750, Statutes of 2007) created the Clean Transportation Program. An unprecedented multi-year public-private partnership of more than 25.

Article Content

Renewable Energy and Zero Emission Mobility and Transportation ...

Transportation Electrification Partnership is committed to accelerating transportation electrification and zero emissions goods movement throughout the Los Angeles region in advance of ...

What is Energy Internet? Concepts, Technologies, and Future Directions

To realize renewable-energy-based electrification goals, a new concept—the Energy Internet (EI)—has been proposed, inspired by the most recent advances in information and ...

Final Project Report

The statute authorizes the California Energy Commission (CEC) to develop and deploy alternative and renewable fuels and advanced transportation technologies to help attain the state's climate change ...

LA County - CTEP

Electrifyze provides expert guidance, incentive information, and support to help you transition to clean transportation. Interested in an EV? Electrifyze Can Help. Powering Los Angeles County's transition ...

Transportation Internet: A Sustainable Solution for Intelligent ...

This paper introduces the Internet as a paradigm and, for the first time, proposes the Transportation Internet (TI), inspired by the similarity between the Internet and transportation.

Transportation Electrification Partnership

As the countdown to the 2028 Olympic and Paralympic Games continues, the Greater Los Angeles region has an incredible opportunity to accelerate transportation electrification and zero emissions ...

Energy Internet: Overview

Energy Internet is an innovative concept based on synergy of multi-energy systems including electricity, gas, cooling and transportation.

Energy Internet

Energy Internet is an innovative concept based on synergy of multi-energy systems including electricity, gas, cooling and transportation.

The Emerging Energy Internet: Architecture, Benefits, Challenges, and ...

The benefits of the energy Internet, along with the challenges of its implementation on a large-scale distributed architecture with the inclusion of renewable energy resources, is discussed. ...

CONCEPTS, TECHNOLOGIES, AND FUTURE PROSPECTS ...

The Energy Internet is a proposed framework for maximising the efficient collection, distribution, and management of energy sources using networked computing and communication systems.
