

High-density modular data center in Congo with a three-year warranty

Overview

Last week, the Democratic Republic of Congo (DRC) launched OADC Texaf Digital — its first Tier-III, open-access, carrier-neutral data center in the country's capital, Kinshasa. This project, in collaboration with Open Access Data Centers (OADC) and the TEXAF group, represents a. Elogic Technologies is proud to announce the launch of its Modular Data Center Solutions in the Democratic Republic of Congo (DRC), marking a major step forward in supporting the region's growing demand for reliable, scalable, and energy-efficient IT infrastructure. Raxio Group is Africa's leading carrier-neutral. A fully self-contained, high-density modular data center that deploys to any site across Africa — without the construction timelines, capital costs, or infrastructure dependencies of a permanent facility. The. It is the first Tier-III data center in the country, offering a carrier-neutral environment that targets various industries from mobile operators to financial services and, naturally, internet service providers. The facility can host up to 400 racks of 48 units each and provide 1.5 MW of computing. Jolting hammer blows, the sounds of iron bars under a workman's blowtorch, the odor of fresh cement: at the foot of the three-story building rising in the Baongo district of the Congolese capital, a sign tells visitors that a “National Data Centre Construction Project in Brazzaville” is happening. Jolting hammer blows, the sounds of iron bars under a workman's blowtorch, the odor of fresh cement: at the foot of the three-storey building rising in the Baongo district of the Congolese capital, a sign tells visitors that a “National Data Centre Construction Project in Brazzaville” is happening.
