

How to apply the grounding quota for distribution boxes

Overview

Attach a ground wire from one of the threaded studs (A) at the bottom of the housing, to the mounting plate (B). The ground resistance between all system parts shall be $< .$ Power from factory ground must be installed by a qualified electrician. Each DISTRIBUTION BOX and controller must be grounded. 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. Subsection (f) of this section also applies to protective grounding of other equipment as required elsewhere in this Article. Calculate electrical box fill per NEC 314. Ensure your installations are safe and code-compliant. Pay careful attention to the definitions that apply to grounding and bonding both here and in Article 100 as you begin th. Added review requirements for pump stations, regulator stations, tanks, and other facilities that are not covered by these standards but shall be submitted for review and approval by other Water System personnel.
