

Installation location of the elevator machine room electrical distribution box

Overview

To install this box, the electric wiring and initial elevator launch should be complete. I believe there is a requirement for proximity to the door. Is there not?

Has this changed OR should I be looking in the, in this case MA, elevator code for. Each car, machine room and hoistway pit must have separate dedicated branch circuits for lighting, receptacles and HVAC, with car and machine-room lighting exempt from GFCI while required for receptacles. Overcurrent devices and disconnects must be located in machine or control spaces, be lockable. (1) Where the elevator machine and control equipment are located at the top of the hoistway, they may be located in a room or space containing other machinery and equipment essential to the operation of the building, provided that they are separated from the other machinery or equipment by a. Three-phase elevator box is installed in the latest step of the process in the elevator machine room. The elevator will be out of service if electric power is not supplied. In Oregon, Raceways and conduits for the connection of elevator devices shall only enter the machine room to the extent necessary to connect the devices attached thereto.
