

Is Huawei a top-tier brand for micro-modules

Overview

The company shows remarkable performance in recent years maintaining its leading position in the world. According to the report, the Chinese tech firm has risen by nearly 8% in the global market for its smart micromodule solutions. Huawei is emerging as the leader of China's national team in semiconductors, dominating chip manufacturing and seeking to integrate the country's entire supply chain. Its ambitions stem from both its placement on the US Entity List and strong government support at the national and local level. By 2022, China accounted for 31. By 2023, Chinese foundries increased their global market share in mature chip nodes from 14% in 2017 to 18%, with domestic customers sourcing 53% of their mature chip supply from. China's semiconductor companies are growing fast in the global chip industry, with Leading Chinese Semiconductor Companies for AI Chips like SMIC, Huawei HiSilicon, and Hua Hong driving innovation. The. The modular data center market of Huawei is growing rapidly, the company has been on top since 2017, says Global Modular Data Center Market Report.
