

Monaco Fiber Optic Cable Laying

Overview

Fibre optic access has arrived in Monaco. After three years of laying 210 kilometres of new network cables, Monaco Telecom, the nation's telecommunications operator, is ready to connect the entire country to high-speed digital internet access. The Principality has made its next step into the digital transition as the technical installations for super high-speed fibre connectivity has been completed after three years of work. According to a statement released by the government on Tuesday, Monaco Telecom has achieved full coverage of the Principality, excluding buildings under renovation. Residents, pedestrians and motorists in the quartier des fleurs will bear the brunt of the works. The Fleur district of Monaco is set to undergo six. This interactive submarine cable map shows global undersea and underwater fiber optic cables connecting continents and countries worldwide. Detailed information, ownership, capacity and.
