

PON Optical Power Meter Operation

Overview

This manual describes the operation of the PON-2M PON power meter. The PON-2M is a very economical option for measuring the output power of ONT and OLT in FTTx PON networks. The PON-2M is NIST traceable, and is calibrated 1310, 1490, and 1550nm. (optical network terminal) and OLT (optical line terminal) are. This PON power meter adopts a TFT high-definition LCD display, it is designed for OLT equipment which is focus on online testing, it is very suitable for FTTx/ PON service adjustment or maintenance usage. An optical power meter is a specific device to facilitate accurate and reliable measurement of this. AFL's FlowScout Downstream PON Power Meter (DPPM) is designed to automatically detect and simultaneously measure coexistent downstream PON power levels at 1490 nm GPON/EPON and either 1550 nm RF video or 1577 nm XG/XGS/10GEPON.

What Is Passive Optical Networking (PON)?

Passive optical networking (PON) provides Ethernet connectivity from a main data source to endpoints, using a technique called passive optical splitting.
