

# Router needs to be modified after fiber optic conversion

## Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. The numbers were much improved, and for a moment, it really did feel like I finally fixed my (semi-useless) internet connection for good. This guide will break down everything you. Fiber internet requires a device called an Optical Network Terminal (ONT) to convert the light signals from the fiber optic cable into electrical signals that your router can understand. I'm Fazlay Rabby — the founder and writer behind Thewearify. For years I have tracked the latency. When I enter the IP address of the mesh network (192. It is still doing router stuff.

## Article Content

Can I use my existing router with fiber?

While many existing routers can connect to a fiber network, there are several scenarios where upgrading your router is not just recommended, but essential to fully leverage the benefits of fiber optic internet.

Rewiring Your Home: Is It Necessary for Fiber Optics?

Rewiring your home is generally not necessary for fiber optic internet installation. Fiber optic service usually connects to an Optical Network Terminal (ONT) at your home, and from there, ...

Cannot access router after upgrading internet with new fiber gateway

The router automatically changed its IP address to 10.0.0.1, as well as all the IP addresses that connect to it. This explains why I couldn't find anything on the network.
