

Safe distance for 10kV ADSS fiber optic cable

Overview

The ADSS cable reel (pay-off) must be located directly in line with the first traveler and must be back from the structure four times the height of the traveler (4:1 distance to height ratio). This guide provides general recommendations for the selection of methods, equipment, and tools for the stringing of ADSS (All Dielectric Self-supporting) fiber optic cables including short and Long Span ADSS cables. Each installation will be influenced by local conditions. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. AFL-ADSS® (All-Dielectric Self-Supporting) cable is ideal for installation in distribution as well as transmission environments. A safe distance must be maintained from power lines of different voltage levels: greater than 1.5m for 110KV, and greater than 3.2m for 230KV. The cable shall be used for aerial installation in accordance with IEC, ITU-T and EIA Recommendation or better has 25 years without any aging can be changed without by a metal cover firmly secured to the flange. A protective wrap shall be.

Flex-Span designs are optimized for a broader combination of fiber counts and span lengths, providing ADSS system designers more flexibility in their product selection.

[Installation of Solo® ADSS All-Dielectric Self-Supporting Fiber ...](#)

Like other fiber optic cables, ADSS cable weighs less than equivalent copper cables and will tend to sag less over a given aerial span. Because of this, it should occupy the uppermost available ...

FOA Standard For Installing Fiber Optic Cable Plants

Since building systems may require many types of cables, both fiber and copper, these cables should be separated to protect the fiber cables from damage and all cables marked properly.

ADSS Fiber Optic Cables

The ADSS cable shall be sagged from the pay-off (cable reel) end and work back toward the take-up equipment starting with the deadend at the first structure near the cable reel.

Flex-Span ADSS Fiber Optic Cable Fiber Optic Cable

Actual link distances may be constrained by attenuation, depending on specific loss budget. continued
