

Setting up a secondary router for telecommunications fiber optic cables

Overview

Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox. A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. The ISP does not. It is indeed feasible to link two routers to one fiber modem and this arrangement can be advantageous, especially in cases of a multi-storeyed residence requiring more WiFi coverage or additional wired connectivity options. Connect the modem to the first router.
