Company Introduction: Fibermint Telecom. The HAILE 8 Optical Fiber Termination Box P1-8-FC is an essential fiber optic distribution frame designed to manage and protect fiber optic cables in various networking environments. Another method of connecting optical fibers is termination or connectorization, which consists of processing the end of a fiber optic bundle so that it can be connected to other fibers or devices through fiber optic. This is where fiber optic cable splicing—the process of creating a permanent, high-performance join between two fiber ends—becomes critical.
