

## The fiber optic box only contains a router

### Overview

So, to directly answer the question: No, the AT&T Fiber box (the AT&T Fiber Gateway) is not technically a modem in the traditional sense. It is an integrated device that includes an Optical Network Terminal (ONT) and a router, often with Wi-Fi capabilities. The ONT is the component that performs. This typically comprises a modem and a Wi-Fi router, provided at no additional upfront cost to ensure you can get online quickly and efficiently. Understanding what's included helps manage expectations and optimize your home network. If you're used to plugging your router into a modem, you'll now connect it directly to the ONT instead. Ethernet cables play a vital role in fiber internet installations. After the ONT does its job of converting optical signals, it passes the data. All Frontier Fiber Internet plans include an eero 7 router that distributes high-speed internet throughout your home via Wi-Fi and Ethernet. ONT typically has ports for.
