

# The top of the distribution box is leaking water

## Overview

The leak or overflow in your d-box may be because of the drain field's groundwater saturation, backing up of the water out into the d-box lid, and drain field flooding. When drainage blockage causes the d-box to overflow, simply sealing its lid or cover is not. When your distribution box shows leakage signs, you have your first clue which tells you that your drainage system beyond the D-Box is not functioning properly. Identifying and addressing these issues promptly is essential for maintaining a healthy and efficient septic system. When it fails, symptoms include uneven wet spots in the yard, slow indoor drains, and sewage odors. Fixes range from jetting clogged outlets. Septic system D box installation, specifications, inspection, diagnosis, and repair: in this article series about septic system drop boxes we describe the best procedures for locating and inspecting, repairing or replacing the septic drainfield distribution box, or the "D-box" or "Splitter box". Two possibilities can lead to this. The box's primary function.
