

What material is the CT cable management frame made of

Overview

With normal- and heavy-duty variants, a wide span of sizes, and hot-dip galvanized construction, it delivers long service life in demanding environments. Includes integrated cable trough roof construction, for improved overhead management, and alleviation of congest from the common patch field. Options Standard cabinet frames support the full line of CableTalk: For high density cable installations: CTC3-MA-14C-FL-B, cage nut style with fibre loop. The CT cable tray is continuously perforated, and made from 1 piece of material. Reduce your data center's PUE by containing the hot or cold aisle air in a CableTalk aisle. Finish: Durable black textured powder paint finish Structure: Frame constructed of rugged 13GA. Copper. CAPE's multi-cable transit modules' (MCTs) patent-pending designs and snap-lock technology provide on-site flexibility to add or remove layers easily and adapt to various cable and pipe diameters.
