

Which company offers the best fiber optic cable for communication in Tonga

Overview

TCL is the only provider of fibre-optic services in Tonga. Prior to laying the cable, Tonga was reliant on satellite internet connections. TCL is currently looking at options to connect the Ha'apai and Vava'u groups to the cable: the SOE's ability to achieve this. Tonga Cable Limited (TCL) owns and manages the fibre-optic submarine cable, connecting Tonga to Fiji, which was commissioned in August 2013. The cable cost was around T\$36 million and was financed through grants from the World Bank Group and the Asian Development Bank. It is 827 kilometres (514 mi) long and was activated in 2013. The Tonga-Fiji Submarine Cable System (also known as Tonga Cable) is a 827km fiber optic submarine cable system linking Nuku'alofa, Tonga and Suva, Fiji, and connects to the Southern Cross Cable Network at the Suva Cable Landing Station in Fiji. Tonga Cable Limited was formed in November 2009, with approval of Government of Tonga, to build and manage a submarine fibre optic cable.
